

Extract from the remarks of the Deputy Commissioner, Bangalore district, on the diary of the Amildar, Bangalore taluk, dated 9th December 1898.

"Dead rats having been found in the houses at Nagasandra near the Basavangudi Health Camp, the Amildar of Bangalore visited the village promptly. The whole village consisting of 60 houses was evacuated forthwith, the people building their own sheds in the fields, the poorer among the villagers being helped with materials for sheds by the Amildar."

Extract from the supplement to the diary of the Superintendent of Police, Mysore district, for the week ending Saturday, the 17th December 1898.

"*
Raiyats have a lively knowledge of the danger of the infectious nature of this disease and use all possible measures in providing visitors with accommodation outside their village under the observation system of their own accord
*"

From—The Plague Commissioner in Mysore. To—The Deputy Commissioner, Bangalore district.
No. 4934, dated 21st December 1898.

I. In view to prevent the City of Bangalore from getting re-infected by persons returning to their houses from infected areas in the District and elsewhere, the Deputy Commissioner, Bangalore district is requested to impress on his subordinates the necessity for enforcing the Plague Regulations as specified below:—

(1) Persons shall not leave a town or village where plague has become indigenous without a pass, (Sections 29-34 of the Additional Regulations, pp. 49 and 50 of the compilation).

(2) Passengers entering the City of Bangalore shall be examined at the Inspection Stations or outposts. Such of them as are free from plague shall be served with observation notices or escorted to their place of destination (Regulation IV, Additional Regulations for the Cities of Bangalore and Mysore, p. 57 of the compilation). Persons suspected to be suffering from plague and those that are in direct contact with them shall be taken direct to the Magadi Road Plague Camp, where the sick will be put into the Hospital and the contacts placed in the contact camp or Health Camp according to the discretion of the Superintendent of the Camp.

(3) The Resident will be requested to re-institute examination of passengers both at Yesvantpur and Bangalore Cantonment and empower a Medical subordinate to receive at the Bangalore City Station such passengers as have to be watched and serve observation notices on them or remove them to the Camp according to the result of the examination at Yesvantpur and Cantonment.

(4) Arrangements will also be made for the inspection of in-coming passengers at Kengeri Station.

II. The Deputy Commissioner is requested to issue strict orders with a view to ensure the adoption of measures (1) and (2). The Chief Plague Officer will be requested to arrange for systematic daily inspection through the Ward Medical Officers of all arrivals served with observation notices.

III. The advantages and privileges of inoculation which are now generally known will, it is hoped, induce all the people to get themselves inoculated.

Extract from Notes of Inspection of the Deputy Commissioner, Kolar district, dated Camp Bagepalli, dated 20th December 1898.

*
12—12—98. Looked up Chinsandra in the Chintamani taluk, where there were several indigenous cases of plague. There were in all 35 deaths mostly among the Mahomedan community, who number over 300. The villagers have completely evacuated the village and are now living in jopidies run up by themselves in the surrounding fields over $\frac{1}{2}$ a mile from the village site. Inquiring into the origin of the outbreak it was ascertained that a Mahomedan family from the Bangalore Cantonment arrived at the village in October last and put up in a mantap outside. There were two deaths from plague in this family, the surviving members of which were removed and segregated a mile away. The mantap was disinfected. About 10 days afterwards a girl named Muni, belonging to the family of the patel, went into it and swept it up and 2 or 3 days afterwards fell sick and died. Soon the whole village was infected, and it was not till there were some 15 or 20 deaths, which were put down to fever and ague, that inquiries were made and plague was found to be prevalent. There were six deaths amongst the Mahomedans and three in the Hindu community since the village was evacuated. The Mahomedan corpses were buried in quicklime and those of the Hindus, cremated. In all cases the jopidies were burnt where they stood and the earth dug up and burnt as well. Fresh jopidies were run up by the villagers at some distance off, and in these the contacts were segregated.

14—12—98. Looked up Kendenhalli where there were 2 suspected cases of plague, and found that as a precautionary measure the whole of the villagers as well as those of the Sonepalli and adjoining village had evacuated their villages and were camped out in the open; spoke to them as also the people of Chenasandra, who were subsequently looked up, and warned them of the great risk they would run if they occupied their houses before the latter and their contents were thoroughly disinfected to the satisfaction of the authorities; and explained to them how an infected house should be disinfected. They were further told that as soon as plague disappeared from amongst them they could occupy their houses, but before doing so, to inform the Amildar, who would be present with the Hospital Assistant and see that each house is thoroughly disinfected and whitewashed. They were encouraged to move freely in the open air and expose the clothing, &c., to the sun.

15—12—98. At Chikballapur, where the infected houses were looked up and found to have been disinfected and large holes made in the roofs to admit sunshine, air, &c. Two-thirds of the people have left the town and a large number of them are living out in the open in the surrounding fields under jopidies. Inspected the Segregation Camp, where 6 arrivals from Bangalore were under observation. Had a meeting of the people at the Travellers' Bungalow in the evening and had read and explained to them the notification regarding Home-Segregation and addressed them on the same lines as at Srinivasapur and Sidlaghatta. They expressed their willingness to do anything that was told them and appeared to realize the terrible nature of the disease.

17—12—98. The village Mudageri, Goribidnur taluk, has been wholly evacuated and the residents, including the *Shanbhog*, an old and intelligent man, who appears to have the confidence of the people and complete control over them, are now living out in the open as at Goribidnur, Channasandra and other places noted above.

Left in the afternoon for Dodkuregode Railway Station, where two cases of plague (imported from the Cantonment, one ending fatally and the other progressing towards recovery) were reported to have occurred at the musafirkhana near by, on the 29th of the last month. On enquiries instituted it was ascertained that the musafirkhana was occupied by Jamadar Abdul Satar, on plague duty, at the Railway Station, and his nephew Mahomed Abas Khan, Abkari Supervisor, and their respective families. Two Mahomedans from the Cantonment, relatives of the Jamadar arrived by train at Dodkuregode on the 23rd November and put up in the temporary thatched verandah at the back of the musafirkhana till the 26th November when they removed into the Jamadar's quarters. They stayed here till the evening of the 29th ultimo, when both of them developing plague, they were stealthily removed to the Police sheds, 3 of which were vacant. No report of this matter was made by the Jamadar and it only came to light when the circumstances were reported by the Constables on plague duty. The Jamadar has been suspended and both he and the Supervisor have been ordered to be prosecuted under Section 188, Indian Penal Code.

18—12—1898. It is satisfactory to note from a report received this day, from the Amildar of Chintamani, that plague is subsiding at Chinsandra and Kendenhalli, as there were no fresh attacks since the past week or ten days. It was also satisfactory to note that throughout the Goribidnur taluk, the villagers when questioned appeared to know exactly what to do and to take an intelligent interest in things generally and which proved that the Amildar of that taluk had done well in moving about and explaining matters to them and that they appeared to thoroughly appreciate the recent orders of Government and able to take care of themselves, as was generally found to be the case throughout the district.

From the Plague Commissioner in Mysore, to the Deputy Commissioner, Bangalore District,
No. 4934, dated Bangalore, 21st December 1898.

I. In view to prevent the City of Bangalore from getting re-infected by persons returning to their houses from infected areas in the district and elsewhere, the Deputy Commissioner, Bangalore district, is requested to impress on his subordinates the necessity for enforcing the Plague Regulations as specified below:—

- (1) Persons shall not leave a town or village where plague has become indigenous without a pass (Sections 29-34 of the Additional Mofussil Regulations pp. 49 and 50 of the compilation.)
- (2) Passengers entering the City of Bangalore shall be examined at the Inspecting Stations or Out-posts. Such of them as are free from plague shall be served with Observation Notices or escorted to their place of destination (Regulation IV (i), Additional Regulations for the Cities of Bangalore and Mysore, p. 57 of the compilation). Persons suspected to be suffering from plague and those that are in direct contact with them shall be taken direct to the Magadi road Plague Camp where the sick will be put into the Hospital and the contacts placed in the Contact Camp or Health Camp according to the discretion of the Superintendent of the Camp.
- (3) The Resident will be requested to re-institute examination of passengers both at Yesvantpur and Bangalore Cantonment and empower a Medical subordinate to receive at the Bangalore City Station such passengers as have to be watched and serve Observation Notices on them or remove them to the Camp according to the result of the examination to Yesvantpur and Cantonment.
- (4) Arrangements will also be made for the inspection of incoming passengers at Kengeri Station.

II. The Deputy Commissioner is requested to issue strict orders with a view to ensure the adoption of measures (1) and (2). The Chief Plague Officer will be requested to arrange for systematic daily inspection through the Ward Medical Officer, of all arrivals served with Observation Notices.

III. The advantages and privileges of inoculation which are now generally known will, it is hoped, induce all the people to get themselves inoculated.

TELEGRAMS.

Telegram from Sub-Division Officer, Closepet, to Deputy Commissioner, Bangalore,
dated 25th December 1898.

Saw Bidadi this morning; whole village vacated except few houses; saw numerous families living in huts outside, no attacks in village, rest will be vacated, report submitted.

Fort St. George Gazette, dated Tuesday the 20th December 1898.

No. 1026.—Whereas the Governor of Fort St. George in Council is satisfied that there is a danger of an outbreak of plague at Kizhoor in the Kurumbranad taluk of the Malabar district, if persons from Mysore State and other plague-infected parts are permitted to assemble at that place on the occasion of the ensuing Kizhoor Chanda (fair):

In exercise of the powers delegated to him under the Epidemic Diseases Act, 1897, His Excellency the Governor in Council directs that no person from the Mysore State, the districts of Bellary, Ananthapur, North Arcot, Salem and Coimbatore and other plague-infected areas intending to be present at the fair, shall be permitted to visit Kizhoor, from the 7th to 28th December 1898. All persons proceeding to Kizhoor in contravention of this Notification will be sent back.

No. 1027.—Whereas the Governor of Fort St. George in Council is satisfied that there is a danger of an outbreak of plague at Berikai village in the Hosur taluk of the Salem district, if persons from the Mysore State, and other plague-infected parts are permitted to assemble at that place on the occasion of the ensuing cattle fair and Kottara festival:—

In exercise of the powers delegated to him under the Epidemic Diseases Act, 1897, His Excellency the Governor in Council directs that no cattle fair shall be allowed to be held this year at Berikai and prohibits the attendance at the festival of persons from the Mysore State and other plague-infected parts, from the 8th December 1898 to 4th January 1899, both days inclusive.

No. 1028.—Whereas the Governor of Fort St. George in Council is satisfied that there is a danger of an outbreak of plague at Udipi, in the taluk of the same name, in the district of South Canara, if persons from the Bombay Presidency, Mysore State, and other plague-infected parts are permitted to visit that place on the occasion of the ensuing Makara Shankramana festival:

In exercise of the powers delegated to him under the Epidemic Diseases Act, 1897, His Excellency the Governor in Council directs that no person from the Bombay Presidency, Mysore State or other plague-infected place intending to be present at the Makara Shankramana festival shall be permitted to visit that place, from the 7th to 13th January 1899, both days inclusive.

All persons proceeding to the above mentioned place in contravention of this Notification will be sent back.

Telegram No. 4687, dated Calcutta, the 12th December 1898.

From—His Excellency the Viceroy. To—Her Majesty's Secretary of State for India, London.

Following plague seizures and deaths reported from places outside Bombay Presidency since 15th December:—

Madras Presidency Districts—

Ananthapur, 8 seizures, 5 deaths.
Bellary, 27 seizures, 26 deaths.
North Arcot, 5 seizures, 3 deaths.
Salem, 7 seizures, 6 deaths.

Cuddapah, 1 seizure, 1 death.
Chingleput, 1 seizure, 1 death.
Kurnool, 1 seizure, 1 death.
Madras City, 4 imported seizures, 2 deaths.

Mysore State—

Bangalore City, 78 seizures, 70 deaths.
Bangalore Station, 634 seizures, 542 deaths.

Mysore City, 12 seizures, 3 deaths.
Other places, 104 seizures, 100 deaths.

Hyderabad State—

Naldurg District, 25 seizures 27 deaths.
Lingsagur District, 195 seizures, 154 deaths.

Gulburga District, 15 seizures, 11 deaths.
Bidar District, 2 seizures, 2 deaths.
Wun District, 1 seizure, 1 death.

Central Provinces—

Wardha District, 27 seizures, 18 deaths.

Rajputana—

One imported fatal case, Abu Road.

No plague reported elsewhere.

Extract, paras 7 and 8 of Doctor Hornabrook's Weekly Inoculation Report for the week ending 25th November 1898.

VII. Influence of Inoculation upon the week's plague mortality—

- (a) For all inoculated : instead of 16·97 deaths, 2 are reported.
(b) For once inoculated : instead of 5·38 deaths, 2 are reported.
(c) For twice inoculated : instead of 11·58 deaths, 0 are recorded.

In the above para the death rate among (1) all inoculated, (2) once inoculated, (3) twice inoculated is compared with what it might have been if the same people had not been inoculated.

VIII. Influence of inoculation upon the week's plague morbidity.

- (a) For all inoculated : instead of 42·42 cases, 6 are reported.
(b) For once inoculated : instead of 13·46 cases, 4 are reported.
(c) For twice inoculated : instead of 28·95 cases, 2 are reported.

In the above para, the plague attacks among (a) all inoculated, (b) once inoculated (c) twice inoculated are compared with what they might have been if the people had not been inoculated.

Extract, paras 8, 9 and 10, of Dharwar Collector's Plague Progress Report for the week ending 25th November 1898.

8. The inoculations of the week at Hubli were 419 (of which 258 were first and 161 second inoculations). The inoculation record now stands thus :—

(a) Twice inoculated	35,558	} 40,772 persons.
(b) Once inoculated	5,214	
(c) Uninoculated	1,434	

The attacks for the week were—

- (a) Twice inoculated nil. | (b) Once inoculated nil. | (c) Uninoculated 8 (all imported).

The total number of attacks including inoculated and uninoculated persons alike for the past three weeks is as follows :—

	Attacks. Indigenous.	Population
Week ending 8th November 1898	7	41,164
Week ending 15th November 1898	1	41,643
Week ending 22nd November 1898	0	42,206

9. The inoculation record for the town of Dharwar stands thus :—

Inoculations of the week :—

- (a) First inoculations 1,306
(b) Second inoculations 1,227 } 2,533 persons.

Total persons inoculated to date :—

- (a) Once inoculated 5,844
(b) Twice inoculated 8,017 } 1,3861 persons.

It will be observed that the number of persons inoculated considerably exceeds the number of people in the town. This is due to the people from the camps outside coming in for inoculation. At the same time a number of uninoculated people are living in the town and will speedily be inoculated.

The protection afforded by inoculation at Dharwar is shown below, the figures being from commencement up to date :—

	Present population.	Total attacks from commencement.	Total deaths from commencement.
Once inoculated	2,726	115	42
Twice inoculated	5,864	29	7
Uninoculated	*2,015	1,169	913

The appended extract from Doctor Hornabrook's weekly return exhibits the percentage figures of protection in detail.

10. The inoculations of the week at Gadag were 770 (of which 502 were first inoculations and 268 second inoculations).

The inoculation record now stands thus—

- (a) Twice inoculated 1,720
(b) Once inoculated 3,242

Total to date .. 4,962

The attacks for the week were—

- (a) Twice inoculated nil. | (b) Once inoculated nil. | (c) Uninoculated 10.

*Of these 731 persons have been exempted either because they have had plague or, owing to ill health or old age.

Supplementary Statement showing in detail the places in the mofussil where indigenous plague cases and deaths were reported in daily returns to Government during the week ending 25th November 1898.
